THE VERY FINEST WASHINGTON GROWN

Tall Bearded Iris

GREETINGS to our many friends and customers. Although our garden is not as large as many others and it does not pay us to put out an elaborate catalog, it is a well known fact that there are no finer Iris and Hemerocallis plants obtainable than those we send out. This year we have enough stock of the finest of the Iris varieties to be able to offer you some super, money-saving specials. We are careful to list only the best as many varieties are not worth space, much less the high prices asked for them. If you live near enough so that you can, do come and visit our gardens, we will be very pleased to greet you.

PLEASE READ BEFORE ORDERING

ORDER EARLY to avoid possibility of certain varieties being sold out.

TERMS. Cash with order, check, draft or money order. 50% of sale will hold order until digging time when it can be shipped C.O.D. if you desire.

POSTAGE is paid on all orders. No orders under \$5.00 please; this \$5.00 must be either Iris or Hemerocallis—NOT to be both. We make no substitutions of varieties, unless second choice is given, and if stock is sold out refund will be made.

WE GUARANTEE good, healthy stock, true to name, and that it reaches you in good condition, but we cannot guarantee the growth in your garden. Any error on our part will be carefully corrected, for our success depends on your being satisfied.

1956 Introductions

STARLA (Tallman) A prodigious flower with glistening allure. The very large fully rounded, slightly ruffled petals gleam as the reflected light of a star, palest green-white. A broad white midrib enhances the white effect. Rather late blooming season. Dormant and 42 inches tall. \$15.00

WHEATLAND (Schmelzer) Distinct—a hemerocallis you will remember. Soft apricot-fawn with very prominent dark rose veining in a beautifully formed, replete flower. Reminiscent of ripening wheat in our fertile valley. 38 in. \$15.00

We feel honored to be the introducers of the lovely Starla, Hybridized by Mrs. A. M. Tallman of Fort Worth, Texas.

OUR FORMER INTRODUCTIONS:

EASTER SUNRISE—A self of a luscious peach tint overlaid soft pink giving quite a pink over-all effect. The ruffled and very waffled petals have a wide white midrib with diamond overlay, the sepals also are heavily sprinkled with silver. The throat is of a most luminous green-gold lavishly shot with sparkling gold. Large, broad form resembling a Dutch amaryllis, distinctly creped with fluted edges, opens wide and the petals have that certain flare that twists them on the end lending an exotic effect. Truly this hemerocallis has to be seen for one to realize how lovely it is. An exotic, lavish beauty! In great demand \$25.00 net

VELVET BUTTERCUP—Large, full, beautifully formed pure buttercup yellow throughout. Very velvety and has the substance of a banana skin. Huge clones and attractive foliage. Has created much interest here. August and September Delivery \$10.00 net

IVORY CHASTE—Very large, wide petaled, purest ivory coloring. This is not white, nor is it cream, it is pure ivory with a lacquered finish. Stands supreme through wind, rain or heat. Best planted in full sun. This flower has great beauty of form and gives a bold, luminous effect. \$5.00

PIEFACE MISSY—The LOVE of our garden! Chosen by all who saw it for introduction. Bright and sparkling in variegated shades of yellow, although it gives a self effect. Large, full, wide open and fluted like a pie. 40 in. tall. Only its vigorous nature allows our selling this clone at this low price. \$5.00

SELAH—Pure rich even gold self. All petals heavily and evenly crimped. While the two top petals completely overlap each other, covering the sepal, they are long and pinched like the pod parent Wau-Bun, though much wider. The lower petal is a fraction under two in. wide. Perfectly balanced, symmetrical clump on tall slender stiff stems. 48 in. \$6.00

ORANJO—Extra large, pure solid orange. All segments are wide and full. Midseason, medium height, strong stems, many blooms and a heavy increaser. \$2.50

RED HAVEN—Large, widespreading, scarlet red with a fiery red eye-zone. Unfading and fine. Nicknamed, by garden visitors, 'the red one.' Very well liked. \$5.00

MYSTIC MELODY—Absolutely huge in size! Wide open, spreading form, Rosy fawn petals and fawn sepals slightly overcast rose—bicolor in effect. The attractive form, heavy ruffling and huge size with its unusual coloring makes this one highly desirable. 34 in. ___ \$5.00

1955 INTRODUCTIONS

TIFFANY — Amber-copper with an orange iridescence. The exact shade of the old glass for which it is named; with an eye-zone the same shade of purple as in the glass. A study in apricot and lavender.

Very distinctive as to color and form. The full, ruffled blooms always attract the attention of garden visitors and its introduction approved by all. Dormant, strong growth and many blossoms. 38 inches **\$15.00**

SETTING SUN — Purest, clear, glistening orange throughout. Very large, wide-spreading form; open but does not recurve. The wide and perfect branching gives this lovely specimen a very long blooming season. Completely dormant and of a very prolific nature. 38 inches **\$3.00**

DAY GLORY — Rounded, full form, medium large, violet-rose self. A clear bright shade of rose in something different and enticing. Dormant and about 34 inches tall. Sold out for 1956. **\$8.00**

Heemerocallis

. . . add just the right touch to your garden to bring out the charm and excitement you have been looking for. They are easily grown, and are so effective in the perennial border, in the foreground of the shrubbery border, for naturalizing through partly shaded woods, along the banks of lakes and streams and are adaptable to any climate. They can be planted any time of the year when the ground is not frozen, but our experience has been that they do better if planted in the spring or just after they are through blooming. DO NOT PLANT YOUR HEMEROCALLIS TOO DEEP. Spread your roots well out and allow for one inch of soil over where the roots join the crown of the plant.
